

Salesforce

cloud based.

→ It builds a software that gives companies a complete view of their customers, so they can build deeper relationships.

→ CRM ⇒ Customer Relationship Management.

⇒ customer 360:

is a collection of powerful apps that put your customer at the heart of your business.

→ It is a complete portfolio of products and it unites our [sales, service, marketing, commerce and it] team with a single shared view of customer information.

5 core values: Trust

Customer success

Equality

Innovation >>

Sustainability

→ 1-1-1 Model

vid - 2

disconnected systems → inefficiency (NO shared data).

Connected systems → united and share Data
Reduces complexity & costs.

$$\text{ROI (Return of Investment)} = \left(\frac{\text{Net Income}}{\text{Cost of Investment}} \right) \times 100$$

→ Customer 360 gives you entire Business

→ Automation

→ Intelligence (AI)

→ Real-time data

→ Customer Experience.

Salesforce CRM tutorial

• Developer Edition → free 1 user storage.

→ Have all apps that Salesforce provide.

→ Every separate app has separate interface.

eg: Sales

→ ⊕ = Global Actions used to create Event, Task, Contact, Case, Lead etc.

→ Lead ⊕ → Newly generated lead

↓
Convert lead [Has a life cycle]

Center

Account Contact New opportunity
[Has life cycle to grab opportunity]

⇒ Create tasks → [for accounts & contacts and mark their status]

⇒ Check due dates for the tasks in Calendar section.

⇒ Files → used to upload files by us or our team and access them

⇒ Dashboards → Can create new dashboards as one liking.

→ In Home → we get summary of what we do in other sections

Sales Cloud

- Home [Dashboards of a user]

» to get a glance of what's going on, inside of Salesforce.

Object: There are different Report types.

» It is an Digital Representation of a real thing

ex: ~~per~~ Contacts, Accounts, Leads etc.

UI

Sales Leads v Contacts v Acct v opportunities v products v etc

Leads

Leads ⇒ Represent unqualified opportunities

ex: filling a form on website

Notes

if we do Account Based Marketing

» we need to start from Account section.

Because, we know our target

companies / accounts

ex: we only provide products to a set of 100 companies. we will put our target market list.

⇒ leader sits independently from rest of the system

⇒ leader is duty so that contacts, leads, & opportunities can be clear.

⇒ when a lead is qualified we convert it to lead, contact, opportunity.

Contacts

⇒ people we want to keep track of.

⇒ qualified lead → contact.

Accounts

⇒ organisations that we want to do business.

Opportunities

⇒ contains stages to close a deal.

⇒ Represents qualified deals we will be doing with some body (organisation).

Products

These are the things that we are offering.

Can be service or product.

→ price book

- different prices for different products
